## PROJECT

### *Infomate 360*

Infomate 360 is a Business Process Management solution for Infomate 360 for the internal use of their team members. It securely catalysis the use of information provided by their clients, by ensuring and restricting the data access only to the concerned persons at concerned times. It also automates their core business process, data, and schedule management with minimal human errors.

- Developed application UI via emerging front end technologies JavaScript, Bootstrap, jQuery, HTML, CSS.
- Collaborated with teammates to deliver valuable features, meeting business customer and business needs.
- Improved and expanded project platforms using JavaScript to develop rich user interfaces.
